

Touch panel production process (example)

Circuit pattern	Forming transparent electrode on substrate
Print/hardening	Printing/hardening of substrate surroundings
FPC pressure	Pressure bonding process of substrate and
Lamination	Lamination process of X/Y each substrate
Appearance/function	Appearance/function testing

Touch panel production process (Example)

Electrode pattern	Printing of electrode pattern on edge portion on substrate
Firing process	Firing of electrode pattern on edge portion
Resist printing	Resist printing on edge portion of substrate
Components	Other components mounting such as FPC press bonding, cable wiring
Appearance/function	Appearance/function testing
